Organic market

TEAM NAME

- ▶ RISHI CHAARY S
- ▶ DHARSHANA J M
- ▶ THIRUVENKATA MUHILAN A
- ▶ SIDDHARTH S

Problem Statement

Absence of middleman less,
verified e-marketplace to sell/buy
organic products.

Key Features

For Merchants,

- Assistance you price your product based on the hourly demand created by your product in our marketplace.

For Buyer,

- Recommendation of fruits and vegetables from our marketplace that suits your health.
- All products are 100% organic.

Proposed Solutions

Fruits and vegetables marketplace, where Govt. certified sellers can list their products to people around them with AI assistance to price their product and Buyer can get AI assisted health based recommendation.

Benefits In The Real World

- Promotes production and consumption of Organic fruits and vegetables.
- Creates a more sustainable market for Organic products.
- Makes organic products affordable and accessible.
- Increases life expectancy of humans.
- Makes earth a more sustainable place.

Target Users
